DESCRIPTION

The Flame Bulb is designed to replicate the natural movement of a real flame using controlled light animation rather than static illumination. Inside the bulb are 72 individual LEDs, arranged to create a layered, dynamic light pattern that mimics the flicker, rise, and variation of fire. Watch as golden embers leap, sway, and swirl within the bulb's enchanted heart, casting a spell of warmth and wonder.

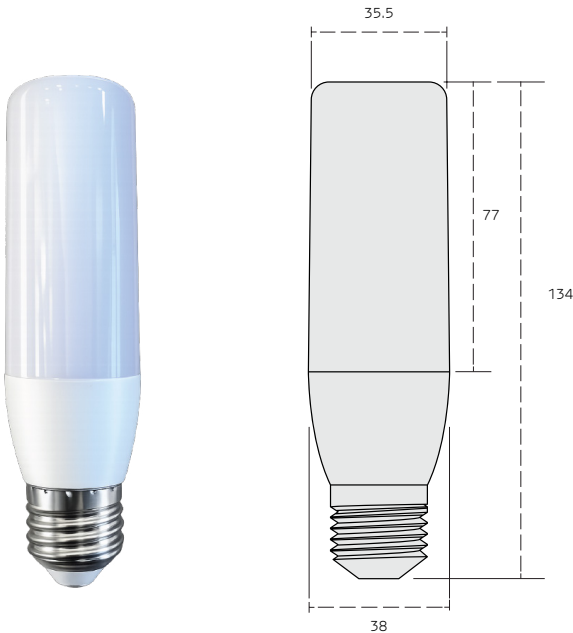

SPECIFICATIONS

SKU	BL-T10-E27-24-FE
Voltage	24V AC/DC
IP Rating	IP65
